EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Hazim Ansari on September 10, 2008.

The application has been amended as follows:

In Claim 30, Line 8 before "...elastomeric material" please delete "an" and insert -
--a continuous--.

In Claim 30, Line 11 before "...elastomeric material" please delete "an" and insert
--a continuous--.

In Claim 30, Line 12 please delete "covers" and insert --encloses--.

In Claim 30, Line 14 please delete "covers" and insert --encloses--.

The following is an examiner's statement of reasons for allowance:

In regards to Claim 30, the prior art alone and in combination does not disclose that the spine of the book is enclosed in any portion. The prior art teaches of stitching the peripheral regions and folding in peripheral regions. However, the stitching is not enclosing the book on top and peripheral regions and the folded regions on the top and bottom are used to reinforce the actual sheet. In another fold the material folds between the page binding and spine of the book but done where the peripheral edges and pockets in the book cover are not connected by a continuous material.

Grande teaches of an elastomeric book cover (Column 4, Lines 21 – 25) where in Figures 1 and 2 the lines 12 and 14 are cut and then the jacket is folded upon lines 16, 18, 20, and 22 (Column 4, Lines 45 - 65). This only creates an opening in the center for the covers and provides no means of folding over a spine with a continuous sheet. The elliptical shape in Figure 4 is merely created by stretching the covers (Column 5, Lines 34 – 37). The spine is locked into place, but there is no material folding over it and it is held in place due to the tight fit of the cover. Figure 5 teaches of an alternate embodiment where the edges are trapezoidal instead of triangular (Column 6, Lines 9 – 20) however, when a book is placed in the cover the corners of the spine are uncovered (Column 6, Lines 26 – 33; Figure 6).

Ostrowski (U.S. 5,092,630) teaches of an adjustable elastomeric book cover with a folded top section and bottom section (Column 2, Lines 40 – 46; Figure 1, Items 34, 36) with edges 18, 20 which are hemmed at sections 26 (Column 2, Lines 46 – 50). The edges are folded over to form side pockets 28 and 30 to fit the width of a book (Column 3, Lines 8 – 12; Figure 2, Items 28 – 30) and book is placed between the pockets (Column 2, Lines 12 – 19) with no disclosure of the portions 34 and 36 having any function with the spine. Furthermore, in Figure 3, the spine of the book is exposed. There is no teaching of the continuous material folding over the spine.

Young (U.S. 3,222,085) teaches of a book cover with pockets formed from folding over panels 2 and 3 (Figure 2 – 4, Items 2, 3) where portions 1A are left unfolded. When a book is placed into the cover the portions 1A are placed between the binding in a book and over the external portions of the spine (Column 5, Lines 42 – 59;

Figure 5, Item 1A). Although folding feature it is not done with a continuous sheet. The reference cannot be used as a modification as it provides a non continuous sheet and the folding feature is also split since two sections 1A exist. There is no continuity taught and therefore any modification would be destroying Young or any reference it is modifying to teach a continuous fold for covering the spine.

Maldonado teaches of a book cover with a material 110 around the peripheral edges 104 – 107 (Column 2, Lines 47 – 50; Figure 3, Items 104 – 107, 110). Furthermore it is seen in Figure 4a that 110 is stitched to the book cover and is not associated with any portion of the book to be covered (Column 3, Lines 1 – 6; Figure 4a, Items 110)

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
